

We presently have High School, and College Graduates who cannot spell, read, or write properly, because, they were not REQUIRED to LEARN these necessary tools-of-life. The present Amateur Radio Examinations test only the applicant's ability to PASS THE TEST, rather than his/her KNOWLEDGE of Amateur Radio. I am OPPOSED to the continued "DUMBING-DOWN" of requirements for an Amateur Radio License, by the proposed ELIMINATION of Morse Code Testing. The PAST is WELL ESTABLISHED, and it is GOOD - - why must you destroy that ESTABLISHED PAST, while appeasing the "Lazy", "The Undedicated", & "The Whiners" while they "want something for nothing", in an Uncertain Future for Amateur Radio. Will we soon be able to "scream discrimination" because "Flying an Airplane is too hard for me to learn, and, I want the rules changed FOR ME" Suggestion to the "Whiners" and "Cry Babies": "LEARN ALL OF IT, OR, STAY OUT" !
